

**UNITED STATES  
ENVIRONMENTAL PROTECTION AGENCY  
REGION 4**

IN THE MATTER OF:	)	<b>AMENDMENT to the</b>
	)	<b>STOP SALE, USE, OR</b>
Seal Shield, LLC	)	<b>REMOVAL ORDER</b>
	)	FIFRA-04-2020-0703
	)	
Respondent.	)	
_____	)	

1. On April 20, 2020, the U.S. Environmental Protection Agency issued a Stop Sale, Use, or Removal Order (SSURO) (FIFRA-04-2020-0703) to the Respondent Seal Shield, LLC (hereinafter “Seal Shield”). Pursuant to the SSURO, Seal Shield is prohibited from offering for sale, selling, distributing, using or removing any of the unregistered pesticide products and the misbranded pesticide device, the ElectroClave UV Disinfectant/Device Manager (hereinafter “ElectroClave device”), identified in paragraph 46 of the SSURO, without first obtaining written approval from the EPA.
2. On April 23, 2020, Seal Shield requested authorization from the EPA to ship a limited quantity of the pesticide device, the ElectroClave device, to two laboratories for the purpose of conducting testing to determine the ability of the ElectroClave to destroy viruses on selected surfaces.
3. Based on the foregoing, the EPA is amending the SSURO issued on April 20, 2020, to authorize Seal Shield to ship a maximum total number of ten (10) ElectroClave devices to the following laboratories (not to exceed five (5) ElectroClave devices to be shipped to each laboratory) for the sole purpose of testing the devices as requested by Seal Shield:

- a. Microchem Laboratory located at 1304 West Industrial Boulevard, Round Rock, Texas 78681; and
  - b. Tulane University, Tulane National Primate Research Center located at 18703 Three Rivers Road, Covington, Louisiana 70433. The shipment will be addressed to Chad J. Roy, Ph.D, Director of Infectious Disease Aerobiology and Biodefense Research Programs.
4. If the Microchem Laboratory referenced above is unable to conduct the testing of the ElectroClave devices as described above in paragraph 2, after submitting written notification to the EPA, Seal Shield will be authorized to send a maximum of five (5) ElectroClave devices to: Pluton Biosciences Laboratory located at 11754 Westline Industrial Drive, Saint Louis, Missouri 63146.
5. Within two (2) days after the dates of each shipment, Seal Shield will provide to the EPA confirmation and proof of the shipment(s) to each of the two (2) laboratories identified above, as well for the return shipment(s) of the devices to Seal Shield after completion of the testing described above in paragraph 2.
6. After testing has been completed, all 10 of the ElectroClave devices involved in testing will be shipped back to Seal Shield within three (3) months from the date the laboratories are in receipt of the shipments, unless Seal Shield sends a written request to the EPA for an extension of time. The request for an extension of time must be sent to the EPA no later than two (2) weeks before the three (3) month expiration date and must include an explanation concerning why an extension of time is needed.
7. All other provisions and terms of the SSURO issued on April 20, 2020, remain in effect until the EPA terminates the SSURO.

8. This Amendment to the SSURO shall be EFFECTIVE IMMEDIATELY upon receipt by the Respondent Seal Shield.
